

- Your choice of specialization doesn't actually matter that much
- You can always change your mind
- Employers generally don't pay much attention to or even know about it
- You can even create your own specialization

- · Look at the required courses within each specialization
- Consider what looks interesting
- Eml
- Obviously, think about the kind of skills you think you need for the job you want/have (if you know)

You
 But don't obsess about this one

about it

- Your choice of specialization doesn't actually matter that much
- You can always change your mind
- Employers generally don't pay much attention to or even know about it
- You can even create your own specialization
- But do pay attention to all the rules, requirements, and deadlines

12/21/2015 4

Your choice of specialization doesn't actually matter that much

You can always change your mind
 The Health Checksheet is good tool for thinking this through out it

You can even create your own specialization

• But do pay attention to all the rules, requirements, and deadlines

# **Sequence of Courses: School Core**

- Microeconomics
- Managing Public Service Organizations
