

New York University
Robert F. Wagner Graduate School of Public Service
Spring 2008

Course Number: P11.2855

Course Title: Budgeting Concepts

Course Description and Objectives:

The focus of this course is on the budget process for health care organizations. Participants are exposed to specific techniques of health care budgeting and variance analysis. The objectives for this course are for participants to improve their understanding of the budget process as it applies to health care organizations and to learn valuable specific techniques of budgeting and variance analysis. This course accomplishes its objectives by covering a wide range of budgeting topics from introductory through advanced. The course is provided in an online format.

The course is six weeks. Each week there are approximately 3 hours of Lessons using video imaging, audio, and power point slides. Students watch and listen to these Lessons online at their convenience via a Blackboard website. During each week students participate in online discussions focusing on not only the Lessons, but also readings and homework problem sets that are assigned for that week. Students taking the course for Graduate credit are required to submit homework assignments via Blackboard each week.

Topics covered include an introduction and overview of health care budgeting covering basic definitions, purposes, and uses of budgets in health care, the long range plan, programming, operating budgets, capital budgets, and fixed and variable costs. A nursing unit operating budget is examined in detail. Additional topics covered include zero based budgeting, cost estimation and forecasting, break-even analysis, performance budgeting, flexible budget variance analysis and capital budgeting. Health care examples and applications are used throughout all parts of the organization.

Another objective of the course is to provide a working knowledge of the Excel computer software program to class participants who are not already conversant in Excel. Tutorial lessons in Excel are provided covering the basic mechanics of Excel, Excel charts and graphs, and the application of Excel to operating budgets, long-range budgets, capital budgets, variance analysis, regression analysis, and forecasting.

Credits:

Wagner School 4 credits (NYU College of Nursing Students May Register for 3 credits)

Times & Location:

Online course is held on Blackboard at: <http://classes.nyu.edu> starting Friday, January 25, 2008. Class discussions end on Thursday March 6. The final exam is available anytime from 9 AM to 7 PM on Monday March 10. The class does not meet in person. All sessions are computer based.

Each week of the course will run from Friday morning through Thursday night. Students taking the course for graduate credit must submit homework each week by Tuesday night. Solutions will be available online each week early Wednesday morning. Homework solutions should be reviewed prior to group sessions.

Approximately 3 hours of online Lesson each week to be watched at your convenience.

Asynchronous online discussions operate continuously over 6 weeks. That is, you may post questions or comments 24 hours a day, 7 days a week at your convenience. This conversation will be conducted using the NYU Lyris Forums system. Participants in the course should enroll in the: 2855budget forum. You should sign up by going to: <http://forums.nyu.edu/cgi-bin/nyu.pl?enter=2855budget> and then clicking on Join 2855budget. You may choose to receive messages by email as they are posted, or in a daily summary form.

One-Hour Synchronous Online Discussions – all classes Noon – 1PM East Coast Time:

Friday January 25 Introduction to Course
Friday February 8 First third
Friday February 22 Second third
Thursday March 6 Last third and Course Conclusion

All class members are expected to get online together for a group class discussion on the four dates above. **However, class members who cannot participate in the live sessions because of class or work conflicts will be able to review recordings of each session, without penalty.**

Final Exam: A 2 Hour Exam taken and submitted online is required if taking the course for Graduate credit. Multiple Choice and Fill in the Blank.
Available online from 9 AM - 7 PM, Monday, March 10.

Faculty: Steven A. Finkler, Ph.D., CPA

If you have questions about this syllabus or course, please contact Prof. Finkler at the email address.

Prerequisites: None

Course Outcomes: Upon successful completion of this course the student will be able to:

1. define budget and identify the major benefits of budgeting for health care organizations;
2. describe the budget process for a health care organization;
3. distinguish among the cash, operating, and capital budget as used by hospitals and other types of health care organizations;
4. explain the difference between average and marginal cost and the role of each, and explain which cost is more appropriate for decisions such as negotiations with an HMO;
5. explain how regression analysis can be used to estimate future costs of health care organizations at varying patient volumes;
6. explain the use of forecasting software for improved forecasting results, and how this might help a health care manager make more effective decisions;
7. prepare a nursing unit operating budget;
8. prepare a breakeven analysis for a proposed new program, project, or venture for a health care organization;
9. discuss the use and advantages of a performance budget for a health care organization, focusing on outcomes rather than inputs;
10. utilize variance analysis to control operating results for health care organizations;
11. discuss the use of process improvement techniques such as zero-based budgeting; and
12. explain the purpose of capital budgeting, and the importance of the time value of money in capital budgeting decisions by health care organizations.
13. be able to create an excel spreadsheet and apply it to budgeting problems
14. be able to create excel charts and graphs

Exemplars

The course focuses on the application of budgeting concepts specifically to nursing units of health care organizations. Many examples use hospital settings, but the material is widely applicable to health care organizations and some other types of organizations are also discussed. Example include preparing operating budgets for nursing units, evaluation of a proposed cardiac surgery service, HMO/PPO negotiations, cost analysis for an outpatient surgery center, cost estimation for an operating room, forecasting supply use for an endoscopy lab, hospital breakeven analysis by DRG, breakeven analysis when revenues are based on per member per month capitation, performance budgeting for a cardiac cath lab, variance analysis for hospital nursing units, clinical supplies, nursing labor, patient acuity, and patient volume.

Teaching/Learning Strategies:

1. Didactic online Lessons using power points.
2. Text reading.
3. Completion of homework discussion questions, numerical, and Excel problems.
4. Review of solutions to homework problems.
5. Asynchronous online discussions continuously throughout the six week session.
6. Synchronous online discussions when the class meets online together in a chat room on Blackboard.

Grading Policy and Evaluation Methods for Graduate Credit:

1. 18% of course grade is based on submitting all required homework problem sets on time. Homework must be submitted by 11:59 PM (just before midnight) each Tuesday night.
2. 82% of course grade is based on the final exam.
3. An average of 70% is required to pass the course.

Course Assignment/Outcome Measures:

1. There will be six weekly homework sets. Submitted homework assignments will each receive full credit of 3% if it appears an honest effort was made to complete the work. They will not be graded for the correctness of the solutions.
2. The final exam will be multiple choice and fill in the blank, but will require numerical calculations to find the correct solutions. A sample final exam will be provided.
3. Students taking the final exam must attest to the fact that they took the exam on their own without any collaboration or assistance from other individuals.

Required Text:

Finkler, Steven A. and Mary L. McHugh, *Budgeting Concepts for Nurse Managers*, 4th Edition, W.B. Saunders Company, New York, 2008. Available at the NYU Professional Bookstore, or online at places such as Amazon.com or BN.com.

Optional Text:

Koers, Diane, *Microsoft Excel 2003 Fast & Easy*, Premier Press, Course Technology, Boston, 2004.

Required Internet sites:

1. All students must have an active e-mail account.
2. The course will rely HEAVILY on Blackboard. The Blackboard site for this course may be found at <http://classes.nyu.edu>

Required Software:

1. You must have internet access. High speed (cable or dsl) is highly recommended.
2. You need to have Adobe Acrobat Reader on your computer. This is free software that you probably already have. If not, you may download it from within <http://home.nyu.edu> . Click on Ask ITS, then in the ITS Software section click on File Management.
3. You need to have a Flash Reader on your computer. This is free software that you probably already have. If not you may download it from within <http://home.nyu.edu> . Click on Ask ITS, then in the ITS Software section click on File Management, and then look under the MultiMedia heading.
4. If you are taking the course for Graduate credit, you must have access to Excel. NYU computer labs have Excel available.

Recommended Journal Articles:

Those listed at the end of each of the assigned chapters from the required text.

Academic Integrity & Professional Behavior Policies:

You are referred to <http://www.nyu.edu/nursing/bulletin/policies.pdf>

In particular, from that site you should note that, “Examples of violating the principle of academic integrity are as follows: • Cheating on an examination • Receiving help on a take-home examination that calls for independent work”

Content Outline

PLEASE NOTE: These lessons were originally recorded to run for about 90 minutes each. That turned out to create significant downloading problems. Therefore the lectures have been subdivided into parts. I have done my best to find reasonable breaking points.

Even with these smaller files, please be aware that it may take several minutes or longer for some of the lectures to download to your computer, even if you are using cable or DSL. It is not recommended that you try to watch these lessons using a dial-up connection.

Week/ Date	Online Lessons/Topic	Required Reading / Assignments due/Exams dates
1. Jan 25 – 31	Welcome and Introduction [Brief Video intro] Lesson 1 - Overview and Definitions [Parts I and II] Lesson 2 - Cost Analysis [Parts I , II, III, and IV] Excel Lesson [1A, 1B, and 1C] [Welcome and Intro, Lesson 1, Lesson 2, and Excel Lessons - total running time: 3 Hours, 15 minutes]	Text: Chapters 1, 2, and 4 (up to middle of page 58). Excel Tutorials (available online) Part IA Basics, IB Charts, and IC Database Sorting. Homework to Submit: Problem Set 1 from the assignment section of Blackboard. Homework is due by 11:59 PM every Tuesday night. (That is, it must be posted before 12:01 AM Wednesday morning).

Week/ Date	Online Lessons/Topic	Required Reading / Assignments due/Exams dates
2. Feb. 1-7	<p>Lesson 3 - Preparing an Operating Budget - Foundations [Parts I, II, and III]</p> <p>Lesson 4 - Preparing an Operating Budget – Calculations [Parts I, II, III, and IV]</p> <p>[Lessons 3 and 4 total running time: 2 Hours, 39 minutes]</p>	<p>Text: Chapter 8</p> <p>Homework to Submit: Problem Set 2 from the Assignments section of Blackboard.</p> <p>Excel Tutorial (available online) Part II .</p> <p>Homework is due by 11:59 PM every Tuesday night. (That is, it must be posted before 12:01 AM Wednesday morning).</p>
3. Feb. 8-14	<p>Lessons 5 – Cost Estimation [Parts I, II, and III]</p> <p>Lesson 6 – Forecasting [Parts I, II, III, and IV]</p> <p>[Lessons 5 and 6 total running time: 3 Hours, 35 minutes]</p>	<p>Text: Chapters 4 (middle of page 58, up to Break-Even Analysis on page 68), and Chapter 6</p> <p>Homework to Submit: Problem Set 3 from the Assignments section of Blackboard.</p> <p>Excel Tutorial (available online) Part III.</p> <p>Homework is due by 11:59 PM every Tuesday night.
