New York University  
Robert F. Wagner Graduate School of Public Service  
CORE-GP 1018 Microeconomics, Summer 2018

Professor Erica Dixon  
Lecture: Tuesday & Thursday 4:00PM – 6:45PM, Silver #206  
Office hours: Tuesday 2:00PM – 3:00PM, Puck #3049  
Email: ericahdixon@nyu.edu  
Phone: 718.916.0146

Teaching Colleague: Colin Murphy  
Recitation: Tuesday & Thursday 7:00PM – 8:00PM, Silver #206  
Email: csm488@nyu.edu

Tutor: Noelle Meyers-Powell  
Tutoring: Wednesday 5:00PM – 6:30PM, Puck Jersey Conference Room  
Email: nmp437@nyu.edu

COURSE DESCRIPTION AND OBJECTIVES

The primary purpose of the microeconomics core course is to enable you to use microeconomic thinking, concepts, and tools in your professional public service work. Accomplishing this also requires refreshing and strengthening your quantitative skills. By the end of the course you should be able to articulate the economic context and analysis of a public problem, use economic concepts in managerial and policy decisions, and progress to second level courses confident of your understanding of microeconomics and its tools.

Students completing the course should gain the following knowledge and skills:

- The ability to articulate tradeoffs in terms of opportunity cost, for individuals and for organizations.
- An understanding of comparative advantage and the gains from trade.
- The ability to employ marginal analysis in all types of decision making.
- An understanding of how economic agents (consumers, organizations, workers, etc.) behave and respond to incentives, and how their decisions collectively affect aggregate outcomes.
- An understanding of how markets work, and the ability to analyze the impact of economic events on market and organizational outcomes.
- The ability to recognize the strengths and weaknesses of markets as a way to organize economic activity, and when market failures are likely to arise. An understanding of how public policy can improve market outcomes.
- The ability to analyze and compare the efficiency and equity implications of alternative policy interventions.
MATH REVIEW

If you are at all unsure of your basic math, algebra and graphing skills, you should either work through this set of materials before the start of the semester: 
http://wagner.nyu.edu/students/services/math_review

You will need a clear and intuitive grasp of these math and graphing concepts to successfully complete this course. These concepts will not be reviewed in class.

BOOKS

The required book for the course is McGraw-Hill’s Microeconomics (2nd edition) by Dean Karlan and Jonathan Morduch. Available from the NYU Book Store. The textbook is also available in Course Reserves at Bobst. Do not purchase the 1st edition.

Additional readings will be available on the course website.

COURSE WEBSITE ON NYU CLASSES

The site can be accessed from the Academics tab in NYUHome or directly here: http://newclasses.nyu.edu. If you have not activated your account or have forgotten your password, go to http://start.nyu.edu.

All announcements and course related documents will be posted to the website. Class announcements will also be distributed via e-mail. Thus, it is important that you actively use your NYU e-mail account, or have appropriate forwarding set up.

All the folders referenced below can be found on the course website by clicking on RESOURCES in the left navigation bar.
COURSE REQUIREMENTS

Readings (pre-class): Readings should be done before the class for which they are listed.

Review Questions and Problems (pre-class): The assigned problems from the textbook should be completed before coming to class. These are not graded but I will assume you have done them. The answers to these problems are posted in the END-OF-CHAPTER SOLUTIONS folder. Do not consult the answers before trying the problems on your own.

News Analysis and Discussion (pre-class): These materials are posted in the READINGS folder. For approximately half of the classes, I will assign specific items for discussion along with a set of discussion questions. You should apply economic reasoning to the issues raised in these readings or podcasts and jot down your answers to the associated questions before coming to class. Your answers to these questions will form the basis of in-class discussion. Your participation in the class discussion will affect your grade at the margin.

Assignments (post-class) 10% of grade:
The eleven written assignments (posted in the ASSIGNMENTS folder) apply concepts from the course to specific problems, and form the basis for the weekly recitations. Please write legibly or type your answers. Completed assignments should be handed to the professor at the start of the next class. Late assignments will not receive any credit. Do not put your assignment in anyone’s mailbox, as it may not be picked up in time to receive credit. These assignments are intended to provide timely feedback on your progress and to teach concepts. They are graded pass (check plus/check/check minus) or fail to promote learning.

Post-class practice problems and videos: Your lecture handout will often include practice problems that should be completed after class. Answers are posted in the ANSWERS TO LECTURE PRACTICE PROBLEMS folder. In some weeks, there are videos that provide a step-by-step solution to these problems. You should complete the practice problem on your own before looking at the answers or watching the video.

Additional study materials (optional): The recitation handouts (see below) also include additional practice problems.

Exams:
40% of grade: In-class midterm exam. No make-ups.
50% of grade: Cumulative final exam, covering material from the entire course. No make-ups.
If you have a conflict with the scheduled exam dates, you should not take this course.
RECITATIONS AND TUTORING

Recitations:
Colin Murphy will lead recitation sessions immediately after lecture on Tuesdays & Thursdays from 7:00PM – 8:00PM in Silver #206. Recitation sessions will not cover new material. They review material from the previous class primarily by going over problems. These are posted in the RECITATION HANDOUTS folder. Assignments will be reviewed in recitation and not during class. While attendance is not mandatory, you will need to master the content of these recitations to successfully complete the course. The average student will need to attend, and I strongly encourage you to do so at least until the midterm exam.

Tutoring hours:
Noelle Meyers-Powell will hold tutoring office hours on Wednesdays from 5:00 – 6:30PM in the Jersey Conference Room at the Puck Building (295 Lafayette Street). Tutoring is not a substitute for the recitation sessions, but an additional resource for questions best addressed one-on-one.

STATEMENT OF ACADEMIC INTEGRITY

As members of the NYU Wagner community, we are all expected to adhere to high standards of intellectual and academic integrity. Wagner’s academic code can be found here: https://wagner.nyu.edu/portal/students/policies/code

For this particular course, there are some specific behaviors required to meet our standards of academic integrity:

Assignments: While I strongly encourage all students to work in groups, the final write up of assignments must be done individually with no sharing of written answers.

Exams: All exams must be the sole work of the individual student.

Violations of these standards will automatically result in all participating students failing the course and being remanded to the discipline committee for further action.

</table>
All readings, review questions, and problems are from Karlan & Morduch 2nd edition, unless otherwise noted.

Class 1: Introduction to microeconomics and why it matters for public service
An introduction to microeconomics and its core principles; main methods and tools of economics (models, variables, graphs, equations). The production possibility frontier as an illustration of scarcity, choice and opportunity cost; comparative advantage and gains from trade.

Reading:  Introduction  
Ch 1  
Ch 2  
Appendix A  
Ch 17 up to page 425  

Review Questions:  Ch 2: 2, 6, 7  

Problems:  Ch 2: 2, 6, 10, 12, 16  
Appendix A: 3, 5, 10, 12  

Assignment:  Assignment 1 due next class

Class 2: Demand and supply basics: price determination
Fundamental model of competitive markets, demand and supply curves; market determination of price and market equilibrium.

Reading:  Ch 3  
Appendix B  

Review Questions:  Ch 3: 4, 8, 13  

Problems:  Ch 3: 3, 5, 6, 9, 14, 15, 16  
Appendix B: 5, 6, 11  

Assignment:  Assignment 2 due next class

Class 3: Elasticity, consumer and producer surplus, and price interventions
The shape of demand and supply curves; the importance of elasticity and its measurement. Measuring gains from trade using surplus. Price ceilings and floors.

Reading:  Ch 4  
Appendix C  
Ch 5  
Appendix D  
Ch 6 up to page 140  

Review Questions:  Ch 4: 8  
Ch 5: 7, 14  
Ch 6: 3  

Problems:  Ch 4: 3, 4, 7, 19  
Ch 5: 14  
Ch 6: 1  

Discussion:  as assigned by instructor
Video: Coffee market problem
Assignment: Assignment 3 due next class

Class 4: Policy interventions: taxes and subsidies
What happens when policy interventions interfere with supply or demand? Tax incidence, deadweight loss and efficiency.

Reading: Ch 6
Ch 20 up to page 503

Review Questions: Ch 6: 6, 8

Problems: Ch 6: 11, 14, 21, 22

Video: Dog walking problem
Assignment: Assignment 4 due next class

Class 5: Production: framing decisions, costs, profits, competitive markets and supply
Decisions made by organizations that result in the supply of goods and services; implicit costs, opportunity costs and economic profit; production functions, cost functions; short-run versus long-run; profit maximization and output decisions of competitive firms.

Reading: Ch 8 pages 197-198
Ch 12 up to page 288
Ch 13 up to page 311

Review Questions: Ch 8: 4, 5
Ch 12: 5
Ch 13: 5

Problems: Ch 8: 4
Ch 12: 10, 11
Ch 13: 5

Assignment: Assignment 5 due next class

Class 6: Production (continued); International trade and tariffs

Reading: Mankiw Ch 14 pages 279-284 (in READINGS Folder)
Ch 17

Review Questions: Ch 13: 11
Ch 17: 4, 9

Problems: Ch 13: 14
Ch 17: 3, 5, 9

Discussion: as assigned by instructor

Class 7: Midterm examination (covers weeks 1-6)
Class 8: Consumer choice and decision-making
Rational decision-making for price-taking consumers; budget constraints, utility; income and substitution effects. Behavioral economics and choice architecture.

Reading: Ch 7  
         Ch 8  
         Ch 23  
Additional reading in READINGS folder

Review Questions: Ch 7: 6, 8  
Problems: Ch 7: 6, 8, 9  
Assignment: Assignment 8 due next class

Class 9: Labor markets
Labor market demand and supply; marginal productivity; human capital theory; compensating differentials; labor market discrimination. Real versus nominal wages.

Reading: Ch 16  
         Ch 21 page 546 onwards  
Additional reading in READINGS folder

Problems: Ch 16: 1, 2, 4, 7, 9, 11  
Discussion: as assigned by instructor  
Assignment: Assignment 9 due next class

Class 10: Imperfect competition
Long run costs and returns to scale. Overview of market structures; monopoly; price discrimination; oligopoly.

Reading: Ch 12 page 289 onwards  
         Ch 14  
         Ch 15 pages 371-375, 378

Review Questions: Ch 14: 3, 12  
                  Ch 15: 15  
Problems: Ch 12: 15, 16  
          Ch 14: 5, 11, 12  
Discussion: as assigned by instructor  
Assignment: Assignment 10 due next class
Class 11: Game Theory and Strategic Behavior
Decision-making with interdependency, game theory, payoff matrices, decision trees. Auctions.

Reading: Ch 9
Ch 15 pages 375-377
Additional reading in READINGS folder

Review Questions: Ch 9: 3, 5
Problems: Ch 9: 3, 4, 11, 12
Ch 15: 12

Discussion: as assigned by instructor
Assignment: Assignment 11 due next class

Class 12: Asymmetric information and incentives
Asymmetric information; moral hazard and adverse selection in insurance markets and the workplace; principal-agent problems and incentives.

Reading: Ch 10
Ch 11 page 258 onwards

Review Questions: Ch 10: 6, 9
Ch 11: 12, 16

Problems: Ch 10: 5, 13
Ch 11: 12, 16, 17

Discussion: as assigned by instructor
Assignment: Assignment 12 due next class

Class 13: Externalities
Positive and negative externalities; remedies involving market incentives; role of property rights.

Reading: Ch 18

Review Questions: Ch 18: 2, 4, 10

Problems: Ch 18: 3, 4, 6

Discussion: Tradable permits exercise - prepare your auction strategy before class

Video: Dry cleaning problem

Assignment: Assignment 13 due next class

Class 14: Public goods; Review of economic applications
Public goods and common resources. Review of market failures and the role of public policy. Review of key lessons from the course.

Reading: Ch 17 of Krugman and Wells (in READINGS folder)

Problems: Ch 17: 1, 4, 13

Discussion: as assigned by instructor

Class 15: Final examination (weeks 1-14)
GRADING CRITERIA

Grades will be assigned according to the following criteria:

A **Excellent**: Exceptional work for a graduate student. Work at this level is unusually thorough, well reasoned, creative, methodologically sophisticated, and well written. Work is of exceptional, professional quality.

A- **Very Good**: Very strong work for a graduate student. Work at this level shows signs of creativity, is thorough and well-reasoned, indicates strong understanding of appropriate methodological or analytical approaches, and meets professional standards.

B+ **Good**: Sound work for a graduate student; well-reasoned and thorough, methodologically sound. This is the graduate student grade that indicates the student has fully accomplished the basic objectives of the course.

B **Adequate**: Competent work for a graduate student even though some weaknesses are evident. Demonstrates competency in the key course objectives but shows some indication that understanding of some important issues is less than complete. Methodological or analytical approaches used are adequate but student has not been thorough or has shown other weaknesses or limitations.

B- **Borderline**: Weak work for a graduate student; meets the minimal expectations for a graduate student in the course. Understanding of salient issues is somewhat incomplete. Methodological or analytical work performed in the course is minimally adequate. Overall performance, if consistent in graduate courses, would not suffice to sustain graduate status in “good standing.”

C/-/+ **Deficient**: Inadequate work for a graduate student; does not meet the minimal expectations for a graduate student in the course. Work is inadequately developed or flawed by numerous errors and misunderstanding of important issues. Methodological or analytical work performed is weak and fails to demonstrate knowledge or technical competence expected of graduate students.

F **Fail**: Work fails to meet even minimal expectations for course credit for a graduate student. Performance has been consistently weak in methodology and understanding, with serious limits in many areas. Weaknesses or limits are pervasive.
