MS PP

(1-YEAR PROGRAM)

MASTER OF SCIENCE IN PUBLIC POLICY

As data becomes increasingly available to the public service arena, talented policy analysts are needed more than ever before. This accelerated, one-year program will teach you the skills to critically assess and communicate data so you can implement effective public policy. The program is uniquely designed to apply classroom learning to real-world experience through intensive practice, a hands-on studio project, and an internship in your field of interest. You'll understand how to effectively analyze and address the most pressing public service challenges of our time—so you can make your impact on the world.

I chose the MSPP program because of its focus on the skills that are integral to policy analysis. Despite having a limited quantitative background, the intensive, cohort-style program caught me up to speed with what I need to know in my professional sector.

Lauren Alper, MSPP 2018Senior Associate, Precision Strategies

- Accelerated and intensive one-year curriculum in policy analysis, quantitative methods, and communications skills.
- Professional internship linked to your coursework, testing classroom skills and ideas against real-world experiences.
- Tight-knit, collaborative cohort within a broader school of public service.
- A powerful community that connects you with key organizations, contacts, and career opportunities worldwide.
- A culminating studio project that uses data as the basis for an individual master's policy analysis brief.

ACADEMIC OVERVIEW

The MSPP is an accelerated, one-year, cohort-based program. The unique curriculum blends policy analysis, management, quantitative methods, and communication skills. The program runs from August through July, and students must be enrolled full-time.

You'll graduate fully prepared for an impactful career in policy analysis in any sector and field—including economic development, education, health, housing, and urban policy. You'll be ready to work for think tanks, policy consulting organizations, government agencies, foundations, and private sector companies—from New York City to cities and countries around the globe.

SAMPLE CURRICULUM

Students must complete a total of 42 credits to graduate.

SUMMER	Methods, Microeconomics, and Management Intensive Summer intensive introducing quantitative methods, microeconomics, and public management
