HPAM – GP 4830.001 Health Economics: Principles
Spring 2022

Instructor Information
- Sherry Glied
- Email: sherry.glied@nyu.edu
- Office Address: Puck, Room 2100
- Office Hours: By appointment only. Times are posted Wagner website

Course Information
- Class Meeting Time: Mondays, 6:45-8:25pm
- Location: 25W4, Room C-1
- Dates: January 24, January 31, February 7, February 14, February 28, March 7, March 21

Course Prerequisites
- Microeconomics, Statistics I
- Proficiency in Excel expected.

COVID-Related Policies
- If you need to miss class for COVID-related reasons or other emergencies, please let me know in advance if possible. Relevant course materials will be shared on NYU Brightspace, and a link to a class recording will be made available.
- In the event that the course needs to be offered entirely online for a particular class meeting, we will meet synchronously at the standard class time using Zoom. Additional instructions about particular details of class meetings or work will be emailed to you in the event of a shift to online instruction.
Course Description
The purpose of this course is to extend students’ understanding of economic theory and empirical research in key areas of health economics and enable students to leverage that knowledge and apply it to timely issues in health policy and management.

Competencies
This course will address the following CAHME competencies:

• The ability to understand how policy and delivery processes work, and to consider the demographic, cultural, political and regulatory factors involved in and influencing health policy and management decision-making.
  [This competency will be assessed through Assignment 1, which examines social determinants of health and Assignment 2, which examines NYC’s sick leave law.]

• The ability to synthesize evidence, and apply statistical financial, economic and cost-effectiveness tools/techniques in organizational analysis.
  [This competency will be assessed through Assignment 5, in which students will be required to apply cost-effectiveness analysis tools.]

• The ability to present convincingly to individuals and groups the evidence to support a point of view, position or recommendation.
  [This competency will be assessed through Assignment 3, in which students will be required to support a policy or management position.]

• The ability to communicate and interact productively (via listening, speaking and writing) on matters of healthcare with a diverse and changing industry, work force and citizenry.
  [This competency will be assessed through Assignments 2 and 4, in which students will be required to write policy and management memos.]

Assignments, exams, and class participation in the course will assess progress against these competencies, and no student will receive a B or higher without demonstration of satisfactory progress towards mastery of each competency.

Course and Learning Objectives

Learning Assessment Table

<table>
<thead>
<tr>
<th>Program Competency</th>
<th>Corresponding Course Learning Objective</th>
<th>Corresponding Assignment Title (Memo, Team Paper, Exam, etc.)</th>
<th>Denote Level of Competency Expected to Achieve via the Assignment (basic = 1, intermediate = 2, advanced = 3)</th>
</tr>
</thead>
</table>

Page 2
The ability to understand how policy and delivery processes work, and to consider the demographic, cultural, political and regulatory factors involved in and influencing health policy and management decision-making.
Be able to apply economic theories to understanding the social determinants of health and the impact of policy. Assignment #1, #2 2

The ability to synthesize evidence, and apply statistical financial, economic and cost-effectiveness tools/techniques in organizational analysis.
Be able to conduct a basic cost-effectiveness analysis of a health program. Assignment #5 1

The ability to present convincingly to individuals and groups the evidence to support a point of view, position or recommendation.
Be able to use evidence to make policy recommendations. Assignment #4, #6 2

The ability to communicate and interact productively (via listening, speaking and writing) on matters of healthcare with a diverse and changing industry, work force and citizenry.
The ability to communicate and interact with a team to develop a policy memo. Assignment #2, #4 2

### Late Assignment Policy
Extensions will be granted only in case of emergency, out of respect to those who abide by deadlines despite equally hectic schedules. Late submissions without extensions will be penalized 10% per 24-hour period.

### Requirements
- Please read the “flipped” lectures before classes (these begin with Lecture 2; there is no flipped lecture for Lecture 5, but please do the reading assignment before class that week).
- Please do all required readings before class and be prepared to discuss the policy reading assigned each week. To reinforce these readings, you are expected to answer the weekly preparatory True/False questions on NYU Brightspace.
- Assignments (65% of grade – 10%, 15%, 15%, 15%, 10%)
- Final exam – (30% of grade) – online – March 24-27
- Weekly preparatory problems – 5% of grade (graded as complete/incomplete)
Required Text

- Title: Health Economics
- Authors: Jay Bhattacharya, Peter Tu, Timothy Hyde
- Publisher: Palgrave Macmillan, 2013
- ISBN: 113702996X, 9781137029966

Assignments

All papers are to be submitted via the NYU Brightspace course site as WORD documents at least 1 hour before the start of class on their due date (3:55 pm). Be sure your name is part of the document file name.

Grading

- Preparatory T/F questions for each lecture are graded as completed/not completed.
- Instructions for specific assignments are listed below. Please follow word count and format instructions for each assignment.

Detailed Course Overview

Session 1: January 24, 2022

Demand for Health, Health Production

Objectives:

- Understand how economic models can be used to structure thinking around health policy and management issues
- Be able to use Grossman’s model of the production of health to analyze issues
- Become familiar with the literature on the relationship between income and health
- Learn approaches to addressing causal inference

Readings:

- WATCH all the videos https://mru.org/courses/principles-economics-microeconomics/consumer-choice-optimization-marginal-utility (Introduction, Budget Constraints, Indifference Curves, Consumer Optimization) [you can watch them at double speed if you are already familiar with this material]
- Review Microeconomics lectures Weeks 5 and 8
- Textbook, Chapters 1, 3, 4 (plus the T/F questions)

These two articles summarize a lot of interesting economics research. Read them as background information.

Policy Issue: Income and life expectancy:

Homework Assignment 1 (10% of final grade; maximum 150 words, due before class on January 31.
Bullet point style is fine):

Lowrey’s article suggests that socioeconomic differences between Fairfax County, Virginia and McDowell County, West Virginia are a source of the mortality differences between the two areas. Tying your analysis as closely as possible to the Grossman model and to the situation described in the story, provide two specific mechanisms through which socioeconomic differences between these counties could be an explanation of the mortality difference and explain that link using the Grossman model’s structure.

Session 2: January 31, 2022

Demand for Health – Demand for Immunizations -- Infectious disease, Externalities

Deliverables:
  • Assignment 1 due before start of class!

Objectives:
  • Become familiar with the problems of externalities in health
  • Understand basic models of infectious disease transmission

Readings:
  • Read Lecture 2 Flipped
  • Review Microeconomics Lecture 13
  • Textbook, Chapters 20 and 21 (plus the T/F questions)

Optional:

Homework Assignment 2 – Individual (15% of final grade; maximum 500 words, due before class on February 7)

Use Grossman’s model of the production of health to develop a plausible hypothesis how NYC’s new sick leave law is likely to affect emergency room use. Use the articles on the NYU Brightspace site to provide evidence in support of your hypothesis.

Tips:
  • Be concise! Don't throw in extra information.
  • There are (at least) three ways that sick leave could affect the use of emergency rooms. Be sure to explain all of channels and note why one of them is probably more important than the others.
When applying the Grossman model itself, do not use graphs or technical notation. Use your own words and write in terms sensible for a layperson. Imagine that you are writing to the mayor or to the chair of an emergency department.

- The new NYC policy will change the cost of time spent sick, the cost of certain preventive care (delivered by a doctor), and the cost of certain kinds of care received when you are sick.

(Remember that not all prevention requires doctors and that not all illness can be prevented.)

Session 3: February 7, 2022

Demand for health – demand for medical care – demand for health insurance -- adverse selection

Deliverables:
 Assignment 2 due before start of class.

Objectives:
- Understand the sources of demand for health insurance
- Be able to apply the idea of utility maximization to potential states of the world

Readings:
- Read Lecture 3 Flipped
- Review Microeconomics Week 12

Page 7
Policy Issue: Voluntary Insurance

Homework Assignment 3 – (draft due February 14 – ungraded – must be handed in before class or assignment 4 grade will be docked 5 points)

Insurance coverage sold in the Affordable Care Act (ACA) marketplaces for non-group insurance must cover a set of essential health benefits and premiums may not reflect individual health status. Some people would like to expand the range of options available to people, including by allowing the sale of renewable, experience-rated short-term health insurance plans, which need not cover the full set of essential health benefits.

You are assigned to a group, and as a group you should prepare to explain—using the Rothschild-Stiglitz model—how this change would likely affect the insurance market and who would gain or lose from this change. The Geruso-Layton article will be helpful. Groups should prepare for their discussion ahead of the next session. By the end of next session, your group should prepare and submit a 300- to 500-word memo summarizing the findings for a group grade.

Session 4: February 14, 2022

Adverse selection

Deliverables: Assignment 3 (draft) due before start of class

Objectives:
- Understand strategies for addressing adverse selection
- Be familiar with the model of efficient moral hazard

Readings:
- Read Lecture 4 Flipped

Policy Issue: Responding to Adverse Selection
- Ian Duncan: Applications of risk adjustment in health care [home page and first 5 minutes]
Homework assignment 4 – (Group paper due February 28 – 15% of grade- maximum 500 words, due before class). Assignment 3 question.

Session 5: February 28, 2022

Cost-effectiveness Analysis Economic Evaluation of Health Interventions

Deliverables:
- Assignment 4 due before start of class.

Objectives:
• Understand the basic methods of economic evaluation of health interventions
• Recognize the difference between cost-saving and cost-effective
• Be able to discuss the problems of cost-effectiveness analysis

Readings:

• NO FLIPPED LECTURE THIS WEEK
• Please watch the following video: How Much Risk are you Willing to Take?
• Textbook, Chapter 14 – 14.1-14.4 (plus the T/F questions)
• ALL STUDENTS: PLEASE READ AND BE PREPARED TO DISCUSS:

STUDENTS WITH LAST NAME ENDING A-L: PLEASE READ AND BE PREPARED TO PRESENT AND DISCUSS

Be prepared to answer:
• What is the question under study?
• Where are the data from?
• What key assumptions are made?
• Do you agree with the assumptions?
• What is missing?

STUDENTS WITH LAST NAME ENDING M-Z: PLEASE READ AND BE PREPARED TO PRESENT AND DISCUSS

Be prepared to answer:
• What is the question under study?
• Where are the data from?
• What key assumptions are made?
• Do you agree with the assumptions?
• What is missing?
• Guide to Analyzing the Cost-Effectiveness of Community Public Health Prevention Approaches (2006), Chapters 1-2 (pp. 1.1-1.3, 2.1-2.9), Chapters 4-5 (pp. 4.1-4.7, 5.1-5.11).

Homework assignment 5 – (Group assignment, 15% of grade -- Cost-effectiveness analysis available on NYU Brightspace. Due by start of class on March 7).

Session 6: March 7, 2022
Moral Hazard-What Services Should Health Insurance Cover?

Deliverables:
- Assignment 5 due before start of class.
Objectives:

- Understand the use of randomized experiments in health economics
- Recognize the welfare losses associated with moral hazard

Readings:

- Read Lecture 6 Flipped
- Textbook, Chapters 2 and 11 (plus the T/F questions)

Homework assignment 6 - (10% of final grade maximum 150 words, due before class on March 21, Bullet point style is fine.)

Is the impact of user fees in developing countries consistent with the results of the RAND experiment? Does any induced moral hazard associated with removal of user fees increase welfare or reduce it?

Session 7: March 21, 2022

Agency – How Should Health Professionals Be Paid?

Deliverables:
• Assignment 6 due before class!

Objectives:
• Understand the problem of agency and its application to health care
• Recognize the different ways of compensating health care providers and the incentives these generate

Readings:
• Read Lecture 7 Flipped.
• Textbook, Chapter 5, read section 5.4; skim other sections (plus the T/F questions)
• Mitchell, Jean M., Jack Hadley, and Darrell J. Gaskin. “Spillover effects of Medicare fee reductions: evidence from ophthalmology.” International journal of health care finance and economics 2, no. 3 (2002): 171-188. Sections 1, section 3 (not math), section 6, section 7 only

FINAL EXAM posted online by 12:00pm on March 24 (THURSDAY)

FINAL EXAM due back by 11:00pm on March 27 (SUNDAY)

Academic Integrity
Academic integrity is a vital component of Wagner and NYU. All students enrolled in this class are required to read and abide by Wagner’s Academic Code. All Wagner students have already read and signed the Wagner Academic Oath. Plagiarism of any form will not be tolerated and students in this class are expected to report violations to me. If any student in this class is unsure about what is expected of you and how to abide by the academic code, you should consult with me.

Henry and Lucy Moses Center for Students with Disabilities at NYU
Academic accommodations are available for students with disabilities. Please visit the Moses Center for Students with Disabilities (CSD) website and click on the Reasonable Accommodations and How to Register tab or call or email CSD at (212-998-4980 or mosescsd@nyu.edu) for information. Students who are requesting academic accommodations are strongly advised to reach out to the Moses Center as early as possible in the semester for assistance.
NYU’s Calendar Policy on Religious Holidays

NYU’s Calendar Policy on Religious Holidays states that members of any religious group may, without penalty, absent themselves from classes when required in compliance with their religious obligations. Please notify me in advance of religious holidays that might coincide with exams to schedule mutually acceptable alternatives.
